TrojanUVSigna™ Named a Winner in 2013 Water Environment Federation Awards

ALEXANDRIA, Va. – The TrojanUVSigna will receive the Innovative Technology Award from the Water Environment Federation (WEF), an international not-for-profit technical and educational water quality organization. The award will be presented on October 8th, during the Awards and Presidential Reception at WEFTEC – WEF’s technical exhibition and conference.

The Innovative Technology Awards, which includes the collection systems, instrumentation, process equipment, and solids handling & disposal categories, are presented annually to WEF associate members who have introduced new innovative products or services related to the construction, operation, or maintenance of treatment facilities.

Incorporating the latest innovations, such as the TrojanUV Solo Lamp™, the TrojanUVSigna reduces the total cost of ownership and drastically simplifies operation and maintenance, making it the ideal solution for large wastewater facilities looking to upgrade their disinfection system or covert from chlorine disinfection.
